

QUALITATIVE DATA ANALYSIS

THEORY & PRACTICE

This intermediate course introduces participants to the theory, process, protocols and practice of qualitative data analysis in the context of a very unique characteristic of qualitative research - where data collection and data analysis operate simultaneously in the inductive process.

A/P NARAYANAN GANAPATHY
NUS ASSOCIATE PROFESSOR

Course Outline

Theory of Qualitative Data Analysis

- Brief overview of qualitative research methodology
- Conceptualizing qualitative data analysis
- Role of qualitative analyst as 'Researcher-as-instrument'
- Dual process of data collection and analysis: implications for research findings
- Research ethics and positionality of researcher

Practice of Qualitative Research Analysis

- Preparation of interview guide
- Techniques and methods of data collection/recording
- Types of field notes
- Types of transcripts and their implications for analysis
- Coding and 'memoing' in analysis
- Analytical strategies in qualitative data analysis
- Writing practices and presentation of qualitative findings in research reports
- Hands-on practice: Working on interview transcripts to 'code' and generate thematic analysis

Prerequisites

At least a Degree in any discipline, with preference given to social science, humanities, law, public policy, and public health.
