  - Comparative Economic Systems**
- **Other interesting applied areas**
  - Entrepreneurship, Social Ventures, Business Ventures.**
  - Gender and Economics**
  - Economics of Sports**

“I had the most wonderful time in UNC-CH. I met amazing people and made life-long friends. The different teaching styles of both universities definitely made me a better student. As an economics student, I took really interesting classes on the soviet economic system and financial markets. I had the opportunity to travel along the east coast during the winter break. Leveraging on the resources of both universities was really helpful. The campus itself was breathtaking and everyone I met was always friendly and ready to help. In all honesty, going on this JDP is hands down the best decision I’ve taken in my undergraduate life.”

**Moorthy, Year 3 Economics student**

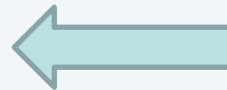

“Hiking in fall. The weather was a cool 15 degrees and the low humidity meant clearing the entire hike without breaking a sweat”

“Taking part in the Carolina Economics Case Competition”

“Traveling to New York City with friends during the winter break and taking in the skyline from the top of the Rockefeller building. You can see the Empire State Building just behind us.”

“Enjoying the view from Hanging Rock National Park in North Carolina.”
